POWER STEERING - nebula.wsimg.com

power steering system in that it allows the mechanical steering to function without interruption in the event the power steering system fails POWER STEERING ELEMENTS The three basic elements of the power steering system are the hydraulic pump actuating or control valve and hydraulic cylinder There are many different arrangements as to

Power Steering Hose Tech

Power steering pumps require a hose with a vacuum rating of 28 INCHES/HG on the inlet side, and a minimum ½" inside diameter This is required to keep the hose from collapsing at higher RPMs As seen in Photo 1 to the left, common hydraulic hose may have a -10 fitting on them, but the inside diameter is smaller than -6 (265")
